Education

National Taiwan University

Sep. 2022 - Aug. 2024

M.S. Computer Science & Information Engineering

Taipei, Taiwan

- Research focuses on 3D human reconstruction, 3D generation, diffusion models, computer vision
 - Nominated as a member of the Phi Tau Phi Scholastic Honor Society, 2024
- GPA: 4.30 / 4.30

National Tsing Hua University

Sep. 2018 - Jun. 2022

B.S. Industrial Engineering and Engineering Management

Hsinchu, Taiwan

- Fall 2022 Academic Excellence Award
 - Industrial Engineering Excellent Project Award
- GPA: 3.68 / 4.30
CS related GPA: 4.03 / 4.30

Projects

CS-Agent

Jan. 2025 - Present

Leadership | System design | Large language models (LLMs) | React.js

- Leading a team to develop an AI agent capable of solving computer science problems via a dedicated API.
- Building a computation API and a web interface to tackle problems in algorithms, data structures, and linear algebra.
- Developed a matrix calculator supporting **20** matrix operations and matrix expressions calculations.

3D Human Reconstruction based on Score Distillation Sampling

Feb. 2024 - Oct. 2024

Diffusion models | Deep learning | PyTorch

- Designed a new 3D human reconstruction system with a **1.9x** improvement in overall reconstruction quality.
- Optimized training strategies, achieving a **3.3x** acceleration in reconstruction time.
- Reduced GPU VRAM usage for reconstruction by **62.5%** through system optimization.

Experience

Jorjin Technologies Inc.

Sep. 2022 - Aug. 2024

Academia-Industry Collaboration

Taipei, Taiwan

Socket programming | Multi-thread programming | 3D human animation

- Developed a multi-user 3D AR teleconference application based on a client-server architecture.
- Designed a new animation pipeline, reducing communication payload by **99%**.

Intelligent Banking Division, E.Sun Commercial Bank

Jul. 2023 - Aug. 2023

Machine Learning Engineer Intern

Taipei, Taiwan

Large language models (LLMs) | Retrieval augmented generation (RAG) | Web crawler

- Built a Traditional Chinese customer service chatbot using LLMs and RAG techniques.
- Developed **4** web crawler programs to collect the latest financial information.

Skills

Programming Languages: Python, C, C++, C#, JavaScript

Technical: Linux, Git, GitHub, Docker, Socket Programming, Multi-thread Programming

Fluent in English (TOEIC: 910)
